

CSI and Design Basis – Free Breakfast Seminar

designbasis, Inc.
Components and Cladding Professionals

Thursday March 18th, 7:00- 9:00 am

Innovations in Structural Glass

Yann Lambert, Architectural Product Manager

W&W Glass

1 Hr AIA CEU credit HSW

Pilkington Planar™
Structural Glass

- Introduction and brief history of the Structural Glass Concept.
- Basic engineering principles of structural glass.
- **Introduction of our Miami-Dade Approved, Point Supported Structural Glass system.**
- The Heat Soak Process.
- A state-of-the-art showing of vertical facades, roofs, and canopies using various back-up structures such as glass mullions, steel cable nets and cable tension.
- Our virtual elimination of common glass anomalies such as roller wave distortion and spontaneous breakage.
- A look to the future, i.e. Activ, self-cleaning glass.

Electrochromic Glass

Bill Myers, Regional Sales Manager

No CEU Credits for this Presentation

SageGlass windows, skylights and curtainwalls control daylight elegantly and efficiently while maintaining your view and connection to the outdoors.

Sage Glass is **electronically tintable glass** that can be switched from clear to darkly tinted (and from darkly tinted to clear) at the push of a button. EC glass can be operated manually or integrated into an automated building management system. SageGlass® EC glass modulates **visible light transmission** and **solar heat gain**, and, in the tinted condition, blocks 98% of the total solar radiation that causes fading.

Come see how your clients can benefit from this new technology.

The Mount Vernon Inn, 110 S. Orlando Ave.

(17/92 at Morse Ave.), Winter Park, FL 32789

Seating is limited. Please Paste this link into your browser to RSVP:
